Veredicto:	Atividade maliciosa
Ameaças:	**Ransomware** Ransomware é um tipo de software malicioso que bloqueia os usuários de seu sistema ou dados usando diferentes métodos para forçá-los a pagar um resgate. Na maioria das vezes, esses programas criptografam arquivos em uma máquina infectada e exigem uma taxa a ser paga em troca da chave de descriptografia. Além disso, esses programas podem ser usados para roubar informações confidenciais do computador comprometido e até mesmo realizar ataques DDoS contra organizações afetadas para pressioná-las a pagar.
